Top-Quality, Performance Charolais & Angus

SALE INFORMATION

Dear Cattlemen and Friends,

Please consider this your personal invitation to join us at Kist Livestock on April 26th. We will be selling an excellent selection of yearling Angus bulls. They will all be semen tested and foot rot vaccinated. The bulls have been fed a free-choice hay, low-grain ration to insure the longevity of their feet. These bulls were wintered at our North place, where we don't have access to a cattle scale like we do at the home place, thus we were not able to collect 365-day data. The bulls are in excellent condition to go to work and will do a great job. There will be power bulls for the cows and many heifer bulls in the sale also.

The cow-calf pairs will be a special offering of many different age groups of our herd. They will be outstanding females with good dispositions, good udders and great bloodlines. These will be long-bodied, thick-made cows. The cows will have many years of production ahead of them and the bonus is, if you like the cow, chances are you will love the calf too! The calves are all February and March born. We will furnish the registration papers on both the cow and the calf at side. The four pair listed as commercial are all very special and have a lot of added value to them, making them all great additions.

Please double check your bull inventory and maybe it would not hurt to semen test your older bulls as the harsh winter has been hard on some of them for sure. The date of April 26th is regular sale day at Kist's so if you have any type of cattle to sell, bring them along.

We hope you can join us, bring your friends and bring your trailer!

Thank you,

Jan, Sally Jo & Randy Severance

Severance Diamond Charolais and Angus Spring Sale

Wednesday, April 26, 2017 • 1:30 p.m. CST

COW-CALF PAIRS

REFERENCE
SIRE

Leachman Right Time - #11750711

REFERENCE
SIRE

Lot 52 - JLS Madame Pride 7430

Lot	ID	Reg.	Sire	Maternal Sire Line	Calf BD	Sex	Calf's Sire
52	7430	16258637	Leachman Right Time	Bushwacker	3/16/17	Heifer	SAV Index 4042

7430 is a true Queen that is royally bred. A maternal sister to the dam of 7430, SAV Madame Pride 8264 sold in a past SAV sale for \$97,500. In 2012, Ellingson Angus sold the dam of 7430 in their sale for \$42,000. The Ellingsons have several full sisters working in their herd today along with many Madame Prides females in the SAV herd are of the SAR Cruzs Pride 8597 and Leachman Right time blood. We have kept every daughter of this great 7430 cow. That is the only reason we can make ourselves part with this sweetheart of a cow. She is quiet, thick made, easy fleshing and just a joy to have around. Here is a chance to own a proven herd builder. Her heifer calf at side by SAV Index will add power and performance. You will get a young female that will have a picture-perfect udder.

53	500	Commercial	Purebred		2/17/17	Heifer	Gaffeny Game Changer 371
----	-----	------------	----------	--	---------	--------	--------------------------

This might be one of the best first calf heifers. The beautiful female lost her ear tag at weaning and we never took the time to try to figure out who she is by the process of elimination or DNA testing. Time went on and she got AI bred and here we are. We feel she will make a tremendous cow and has an EPD giant of a heifer calf at side, sired by the \$295,000 Game Changer, that will be a great asset also. Don't pass up on this one.

54	5032	Commercial	Angus/Charolais		2/1/17	Heifer	SAV Ten Speed 3022
----	------	------------	-----------------	--	--------	--------	--------------------

The dam of this first-calf heifer is the picture-perfect Angus cow. We were surprised when this cow was born to see that she was Charolais sired as the dam calved to her Angus bred AI date. We believe our Charolais herd sire got with her somehow in our lots without us catching him. 5032 will make a great commercial cow and her heifer calf at side sired by the \$260,000 SAV Ten Speed will make super cow someday too.

55	9570	Commercial	Purebred	SAV 8180 Traveler 004	2/19/17	Bull	SAV Index 4042
----	------	------------	----------	-----------------------	---------	------	----------------

This is a really thick made cow who did not get registered as calf. The bull calf at side sired by the \$35,000 SAV Index will make a great commercial bull. He has that thick made look to him already!

56	2	Commercial	5-year-old		2/17/17	Heifer	SAV Seedstock 4838
----	---	------------	------------	--	---------	--------	--------------------

This is a really good commercial cow that has been used as a recipient cow in our ET program. She is very quiet in the chute, very good at calving, and does an excellent job of raising a calf. Last spring as we were setting up our recipe for embryos, this cow came into heat 2 days early. She was out of time with the group, making her not work for the implanting. So I did the next best thing and AI'd her to the \$235,000 SAV Seedstock 4838. Here is some info on Seedstock and his phenomenal dam, SAV Blackcap May 4136: She is a major impact, multi-trait leading cow with an unprecedented production record. She generated over \$4,000,000 in progeny receipts and is the most prolific and influential cow in the history of the SAV herd. He has majestic maternal presence, is loaded with performance and is structurally superb. SAV Seedstock 4838 is powerfully built and stunning from all angles with superior soundness and herd bull authority. This cow and her Seedstock heifer calf at side would make a great pair for anyone.

View EPDs and pedigrees of reference sires at angus.org by entering the registration number in the search field.

We have pulled a hair sample for DNA testing of lots 33 thru 52 to send in to AGI to clean the pedigree of any potential defect.

We will submit the samples and pay for the tests. Results take about six weeks.
